## AUTHORS AND CONTRIBUTORS

## Playgrounds and Recreation Spaces

Introduction by Alfred  
Ledermann and Alfred  
Trächsel. Translated by  
Ernst Priefert

8 $\frac{3}{4}$ " by 11 $\frac{1}{8}$ ". 176 pages  
with 302 halftones and  
83 line illustrations.  
63s. 0d. postage 2s. 0d.

ready shortly

It is now recognised by planners and local authorities that imaginatively-designed children's playgrounds and adult recreation spaces should be regarded as an essential amenity for all urban areas of any size, whether new or old; but so far very few really successful examples have appeared in the British Isles, and children in towns and cities continue, at their peril, to play their games in streets

and roads. On the Continent, in Scandinavia and in the U.S. however, the subject is being tackled with the seriousness and care that it deserves, and there are many interesting and successful solutions to be seen.

This book, after short introductory essays written by two of Europe's leading playground designers, consists of photographs and plans of a great variety of interesting ex-

amples taken from many countries. Each scheme is accompanied by a short explanatory text, together with constructional details. Examples shown range from the smallest and most inexpensive to large schemes covering many acres, and they contain a wide variety of ingenious ideas, constructions and equipment for play and recreation.

THE ARCHITECTURAL PRESS 9-13 QUEEN ANNE'S GATE WESTMINSTER SW1

# a selection of **BOOKS** from **The Architectural Press catalogue • 1959**

- Acoustics in Modern Building Practice**, by Fritz Ingerslev 35s. 0d.
